

FTK Add-On: AccessData Visualization

Our new Visualization module allows users to graphically analyze both file and email data in seconds, including timelines, cluster graphs, pie charts and more.

AccessData Visualization is another market innovation brought to you by the leader in forensic technology, AccessData. This exciting new add-on for FTK® integrates a graphical analysis engine into our market leading forensic product. AD Visualization extends the capabilities of the product to provide another powerful way to improve efficiency and enrich communication about case specifics.

Email Visualization

- Adjust scale and focus of communication periods in days, weeks, months, years and decades.
- Quickly determine and convey peak communication periods in a graphical format.
- View email custodian level details including sent and received statistics to pinpoint periods of interest.
- Graphically represents the social network of an email custodian to determine strength/frequency of communication.
- Obtain key insight into the interaction among potential persons of interest and flag these email exchanges in FTK®
